#MeerStaking

7个

说明：本系列报告数据采集以每90000个mainHeight为标准，即与锁仓期同步。

自第七期结束（[order=706767](#)），截至到 2022-05-07 17:30:39 达到主链高度 720000（[order=808079](#)）为止，

- 全网日均算力维持在 800~920TH/s 之间，整体算力相对稳定；
- 当期并发率 12.57%，相比于上一期的 9.36%，有小幅增长，短时间内的算力波动频率有所增强；网络累积并发率轻微增长至 12.23%；
- PoW 产出量约 1013120 meer，期间累积映射释放量约为 818489 meer，故当期实际产出总量约为 1831609 meer，累积总产量约 1463 万meer。

第八期的结束区块产生于2022-06-08 01:24:16在主链高度区间 [630000, 720000) 内添加到锁仓池的资金将计入第八期的新增资金中。

[\(order=808079,mainHeight=720000\)](#)

在第八期，两个池的新增锁仓总量为 1247696.7146125 meer。

- 守卫池新增锁仓量为 684316.83361250 meer
- 荣耀池新增锁仓量为 563379.881 meer

故当期竞争激励的获得者为守护池，当期竞争激励为 97200 meer，平均分配给所有新增资金，附加收益率约为 14.2%。

截至第八期末,累积总锁仓总量为 6646973.90021098 meer,锁仓率为 46.16%。因此，第八期可获得的基础激励是  $874800 \times 80\% = 699840$  meer，每个锁仓池各 349920 meer。

本期守护池基础收益率最高为 10.77%（合年化 129.24%），最低为 2.15%（合年化 25.8%）；荣耀池的基础收益率最高为 11.71%（合年化 140.52%），最低为 2.34%（合年化 28.08%）。

#### 第八期收益明细【Details for Profit of the Eighth Period】

- Basic Incentive of Guard Pool  
守护池基础激励

### Qitmeer Umayyad Network 1.0 Operational Status and Lockup Profit Details (Period 8)

Note: Data collection for this series of reports is based on every 90,000 mainHeight, i.e. synchronized with the lockup period

Since the end of the seventh period ([order=706767](#)), until 2022-05-07 17:30:39 when the main chain height of 720000 ([order= 808079](#)) has been reached:

- Relatively stable in hashrate of the whole network, and the average daily hashrate is maintained between 800~920TH/s.
- The concurrency rate of this period is 12.57%, compared to 9.36% in the previous period, a small increase, the frequency of hashrate fluctuations in a short period of time has increased; the cumulative network concurrency rate increased slightly to 12.23%.
- PoW output amount is about 1013120 meer and the cumulative mapping release amount during the period is about 818489 meer, so the total actual output for the period is about 1831609 meer and the total cumulative production is about 14.63 million meer.

The end block of the eighth period has generated at 2022-06-08 01:24:16, the funds added to the locking pools in the mainHeight interval [630000, 720000) are included in the newly added amount of the eighth period.  
([order=808079](#),[mainHeight=720000](#))

For the eighth period, the total newly added amount of the two pools is 1247696.7146125 meer.

- The newly added amount for the Guard Pool is 684316.83361250 meer,
- The newly added amount for the Honor Pool is 563379.881 meer

The current competitive incentive winner is the Guard Pool and receives a current competitive incentive of 97200 meer, which is divided equally among all new funds, with an additional return of approximately 14.2% .

The total cumulative lock amount is 6646973.90021098 meer until the end of the eighth period, and the staking rate is 46.16%. So the basic incentive available for the eighth period is  $874800 \times 80\% = 699840$  meer, 349920 meer for each pool.

For the current period, the highest basic profit rate of guard pool is 10.77%(annualized return 129.24% ) , and the lowest is 2.15%(annualized return 25.8%). And, the highest basic profit rate of honor pool is 11.71%(annualized return 140.52%) , and the lowest is 2.34%(annualized return 28.08%)
